

Description

The DIM-4 is a long life, Dusk-to-Dawn Twistlock Photocontrol that sends an LED dimming signal through an ANSI C136.41 compliant receptacle at MidNight.

Features

- Saves power, saves money, quickly pays for itself
- Advanced time/date algorithm auto-adjusts for daylight savings
- Just plug it in - will automatically synchronize to local time
- Advanced light sensor, only reacts to sunlight
- Immune to LED and other artificial light
- No false activations (no cycling)
- May be oriented in any direction

Benefits

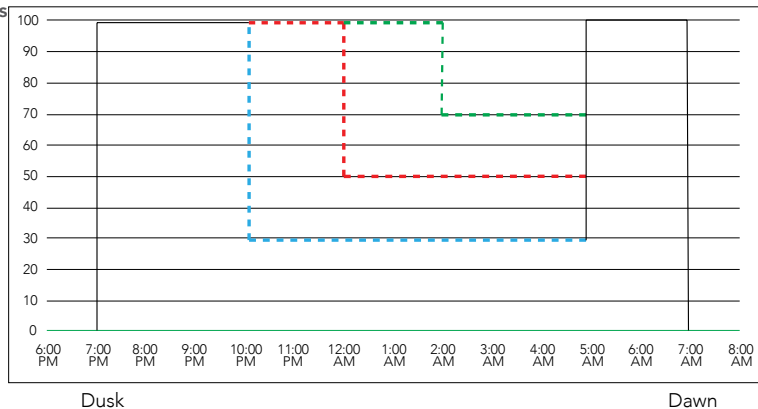

- No Network Required
- Extend the life of the Fixture
- Long Life Photocontrol features
- AM Ramp up to Full Brightness
- Robust Surge Protection
 - 40k Amp MOV/640Joule
- Light Diagnostic on Installation
